

C conditional statements: Write code on the following scenarios

Beginner Level

1. Temperature Check

Write a C program that takes a temperature as input.

- If it is above 30°C, print "Hot"
- If it is between 20°C and 30°C, print "Warm"
- Otherwise, print "Cold"

2. Even or Odd

A user enters an integer.

- Print "Even" if the number is divisible by 2
- Otherwise, print "Odd"

3. Voting Eligibility

Ask the user for their age.

- If age is 18 or above, print "Eligible to vote"
- Otherwise, print "Not eligible"

4. Simple Calculator (Switch Case)

Take two numbers and an operator (+, -, *, /).

- Use a switch statement to perform the operation and display the result.

Intermediate Level

5. Grade Evaluation

Input marks (0–100).

- 70–100 → "A"
- 60–69 → "B"

- 50–59 → "C"
- 40–49 → "D"
- Below 40 → "Fail"

6. Leap Year Checker

Input a year.

- A year is a leap year if:
 - Divisible by 4 AND not divisible by 100
 - OR divisible by 400
- Print whether it is a leap year or not

7. Largest of Three Numbers

Input three numbers.

- Determine and print the largest using if-else

8. Login System

Simulate a login:

- If username is "admin" and password is "1234", print "Access granted"
- Otherwise, print "Access denied"

Advanced Level

9. Electricity Bill Calculator

Units consumed determine cost:

- First 100 units → \$0.5/unit
- Next 100 units → \$0.75/unit
- Above 200 units → \$1.2/unit
- Calculate total bill using conditions

10. Triangle Type Checker

Input three sides of a triangle.

- Check if it's valid
- Then determine if it's:
 - Equilateral
 - Isosceles
 - Scalene

11. ATM Withdrawal System

User enters amount to withdraw:

- Must be a multiple of 100
- Must not exceed balance (assume balance = 10,000)
- Print success or error message

12. Character Type Checker

Input a single character:

- If it's a vowel → print "Vowel"
- If it's a consonant → print "Consonant"
- If it's a digit → print "Number"
- Otherwise → print "Special character"
